

## ENGRAVING

The most durable method of custom marking. Perfect for environments with frequent use, such as hospitals and schools.

- **Process:** Deep etching on the plate surface filled with paint for permanent marking.
- **Materials:** Brushed or polished stainless steel, brass, bronze, thermoplastic, or anodized aluminum. Note: Chrome and painted cold-rolled steel are not recommended.
- **Colors:** Standard paint fill in Black, Red, and White (custom colors available).

### Ordering Requirements

*Specify letter size (1/8" to 3/8" standard)  
Include a sketch of the plate layout  
Minimum order: 1 piece  
Engraved plates are non-returnable*

## SILK SCREENING

Ideal for large quantities or complex designs.

- **Process:** Photo-negative design transferred to a screen, applying ink to the surface for a precise finish.
- **Materials:** Smooth painted cold-rolled steel, brushed stainless steel, brass, bronze, thermoplastic, or anodized aluminum.
- **Colors:** Standard lettering in Black, Red, and White (custom colors available).

### Ordering Requirements

*Specify letter size and colors  
Submit photo-reproducible artwork for trademarks or designs  
Minimum order: 10 pieces (50+ recommended for cost efficiency)  
Silk-screened plates are non-returnable*
